

Adrián Daniel Ustariz Ortiz

Junior Fullstack Developer

ABOUT ME

I create agile and intelligent solutions, with skills in software development and a constant focus on learning and adapting to new technologies. I develop Information Systems focused on providing effective and functional solutions that improve real-world processes and address actual needs.

Through my experience, I have strengthened critical thinking, attention to detail, and teamwork skills, which contribute to my professional goal of specializing in data science to contribute to the development of intelligent software.

SOFT SKILLS

- Critical Thinking
- Problem solving
- Teamwork
- Creativity
- Leadership

LANGUAGES

- English - Advanced

EXPERIENCE

Cinemark System

Campuslands - 2024

Desktop application developed in Java Swing with the JDBC framework. It allows managing all aspects of a cinema from the perspective of an administrator and a ticket seller. It enables printing tickets in PDF, generating purchase orders, and exact inventory management.

Copetran System

Campuslands - 2024

A fullstack web app developed using Django, React, Docker, HTML, and CSS to manage employee, bus, route, and trip registrations from the administrator's side, and to register customers and sell travel tickets from the ticket seller's side.

Clothing and vinyl store

Campuslands - 2024

I developed the creation of a landing page that enables the proper implementation of a shopping cart to add, sell, buy, and register users.

EDUCATION

Software development training

Campuslands- 2025

Software Development Technologist

UTS (2022 - in progress).

Systems Technician

SENA (2019)

HARD SKILLS

- JavaScript
- React
- MySQL
- Python
- Java
- SpringBoot
- Git
- Django
- Docker
- PostgreSQL
- HTML
- CSS
